EDUCATION

Northeastern University Miami, FL *Master of Science Computer Science* Graduation: May 2028

Florida International University Miami, FL *Bachelor of Arts in Computer Science* Graduation: May 2026

Study Abroad: Web Applications in Czech Republic (Summer 2025)

EXPERIENCE

Kinro Manufacturing – Software Developer Intern November 2025 – May 2026 *Pembroke Pines, FL*

- Developed and deployed a containerized lot expiration alert service using docker and python that scanned inventory nightly and emailed the team about any near shelf life limits helping reduce expired stock write offs by 8%.
- Maintained and helped develop web applications that tracked MRE production batches with their lot numbers, shelf-life dates, and improved traceability across production lines.
- Tested and documented any new features from the team and flagged any defects before they reached production.

NEX-XOS - Web Developer February 2023 – September 2024 *Miami, FL*

- Developed and maintained responsive web applications using HTML, CSS, and JavaScript, implementing responsive design principles for seamless cross-device experience.
- Built and integrated RESTful APIs, ensuring optimal data flow and integration between front-end UI/UX components and back-end services.
- Conducted thorough testing and debugging cycles to identify and resolve performance and functionality issues, improving overall application stability.

PROJECTS

Encryption Key Generator

- Built a responsive browser-based tool for generating secure encryption keys, UUIDs, and random passwords.
- Used the Web Crypto API to generate keys locally without sending data to a server.
- Created a static HTML, CSS, and JavaScript project deployable through GitHub Pages.

Voice-Controlled Desktop Assistant

- Developed a voice-controlled windows assistant using Python to recognize wake words and execute any spoken commands.
- Integrated speech recognition and text to speech libraries to enable hands free interaction and audio feedback.
- Implemented command parsing and desktop automation to launch applications such as Google, Files, Spotify, and perform Google searches through voice commands.

TECHNICAL SKILLS

Languages: Python, Java, C++, C, SQL.

Web & Frameworks: HTML, CSS, React, REST APIs

Cloud/DevOps: AWS, Docker, Git.
